

4th EUFEMED CONFERENCE *TABLETOP | Exhibition | your support*

25-26 May 2023, Langenbeck-Virchow-Haus, Berlin (Germany)

We would be very pleased to welcome you face to face after the cancelled face-to-face event in 2020 and the online congress in 2021. EUFEMED Conferences are the forum for research and development scientists and staff from all over Europe to share and discuss experience on new developments, standards, methodologies and hurdles in early medicines development. Academia and industry sponsors, CROs, competent authorities, and ethics committees are working closely together to optimise the development of new therapeutic, preventive and diagnostic options for patients. However, new concepts, technologies and methods do not always find the space to be presented, broadly shared and discussed and therefore EUFEMED wants to provide an efficient floor for exchange of know-how between all stakeholders. The upcoming conference will enable this in different ways:

- The sessions are dedicated to different currently relevant topics and enable information and discussion in the plenary.
- The exhibition is an opportunity for service providers to present their company/organisation and services.
- And new in this conference and a first time option: service providers and industry/academia sponsors can book a Tabletop and personally present an innovative tool/technology/methodology at the Get-Together evening.

We invite you to concretely contribute to all our knowledge and progress awareness. At the same time you support EUFEMED as your "European professional family". If you want to support this conference financially, we would like to invite you to sponsor the lunches or coffee breaks or the Get-Together evening or the poster prices.

To validate your registration, please return this form until 31 March 2023
